GENERAL ALLEGATIONS

9. The Site, located in McKinley County, New Mexico, is an inactive U.S. Army depot whose former mission was to store, ship, and receive material and to dispose of obsolete or deteriorated explosives and military munitions. In 1993 its active mission ceased and the installation was closed. Prior to closure the Site comprised approximately 22,120 acres.
10. The Site is a "facility," as defined in Section 101(9) of CERCLA, 42 U.S.C. § 9601(9). The Site includes an approximately 7,400 acre magazine or "Igloo" area consisting of 732 earth-covered igloos and 241 earthen revetments previously used for storage of munitions; Open Burn/Open Detonation areas; a 700 acre industrial area containing former ammunition maintenance and renovation facilities, an 800 acre administration area containing offices, housing, warehouses, and other structures; and approximately 7,400 acres of buffer zones.
11. Activities at the Site resulted in the release of hazardous substances, including lead, arsenic, other metals, volatile organic compounds, polychlorinated biphenyls (PCBS), explosive compounds, and others.
12. Environmental cleanup of the Site is being conducted pursuant to a permit issued in by the New Mexico Environment Department pursuant to the federal Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. § 6921 et seq. The RCRA permit as issued covers one Hazardous Waste Management Unit and a total of 93 Solid Waste Management Units and Areas of Concern. The RCRA Permit was subsequently modified to add a Corrective

Action Management Unit for treating explosive waste. The Permit requires cleanup to residential risk-based standards.

13. As parcels are removed from the permit upon completion of cleanup, the Army will return them to the U.S. Department of Interior, which will then transfer them in trust to either the Zuni Tribe or the Navajo Nation, as appropriate.
14. The Plaintiffs conducted natural resource damage assessment activities at the Site pursuant to Section 107(f) of CERCLA, 42 U.S.C. § 9607(f), including habitat equivalency analysis for selected solid waste management units and areas of concern and for groundwater. Each of the Plaintiffs incurred assessment costs.
